

Kali

It is easier to install Kali VMWare versions. Then in VMWare Workstation, open downloaded **kali.vmx** virtual machine. Need to configure this virtual machine **Network Adapter** as following capture. default username and password are both **kali**.

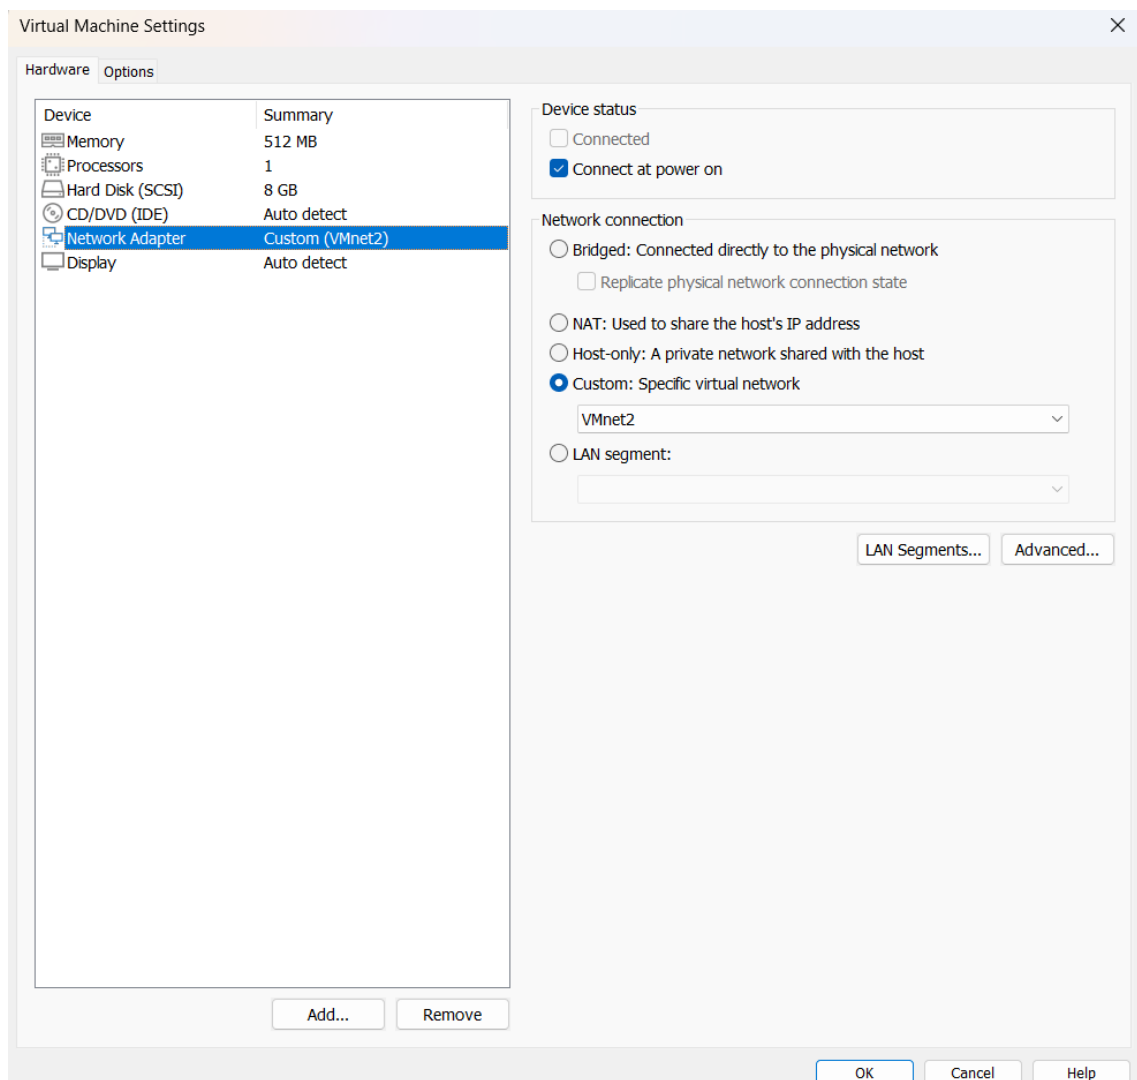

Metasploitable Server

Download metasploitable-linux-2.0.0.zip from below sourceforge Link: <https://sourceforge.net/projects/metasploitable/files/Metasploitable2/metasploitable-linux2.0.0.zip/download>

1. Open unzipped virtual machines, and configure as follows, can delete Network Adapter: Host-only.

default username and password are both **msfadmin**

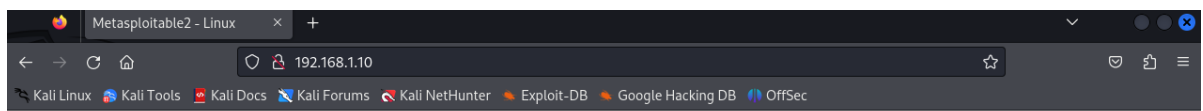

Finally, get the IP address under subnet 192.168.1.x/24

```
