

Win10 Join Active Directory

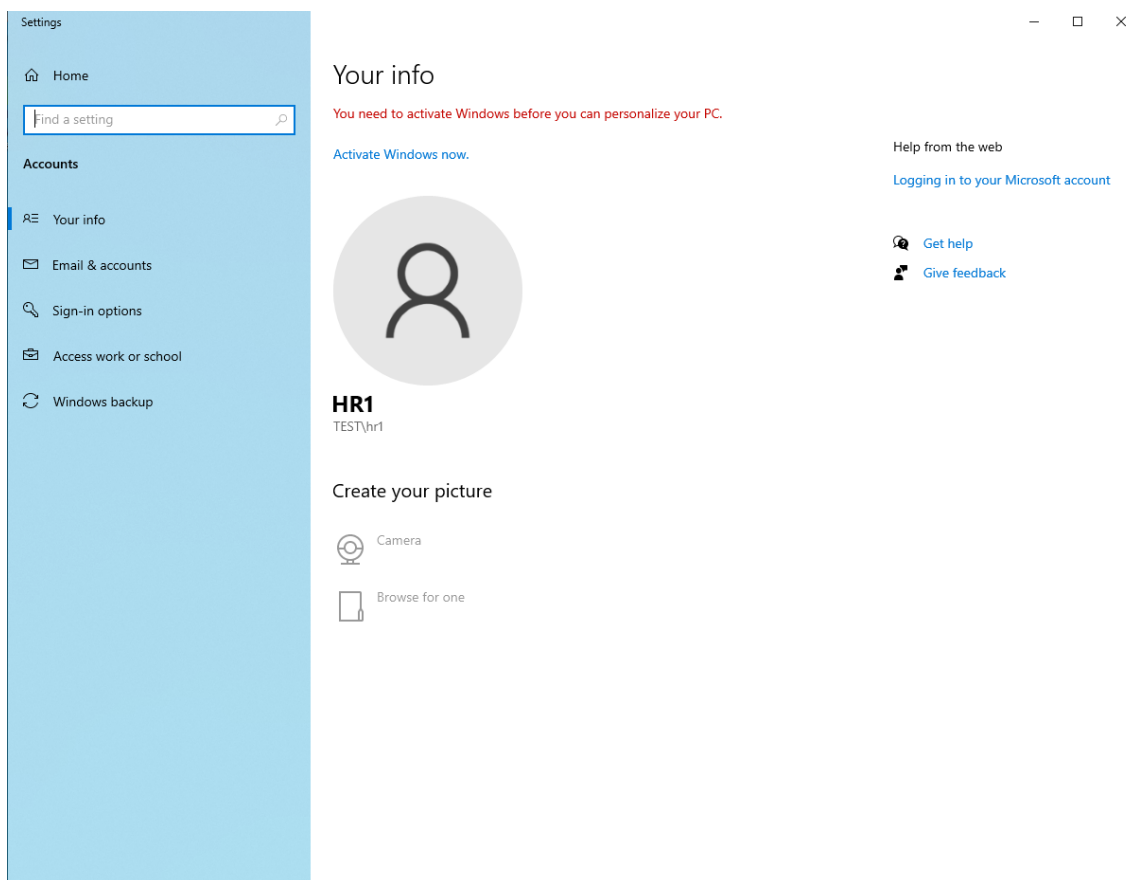

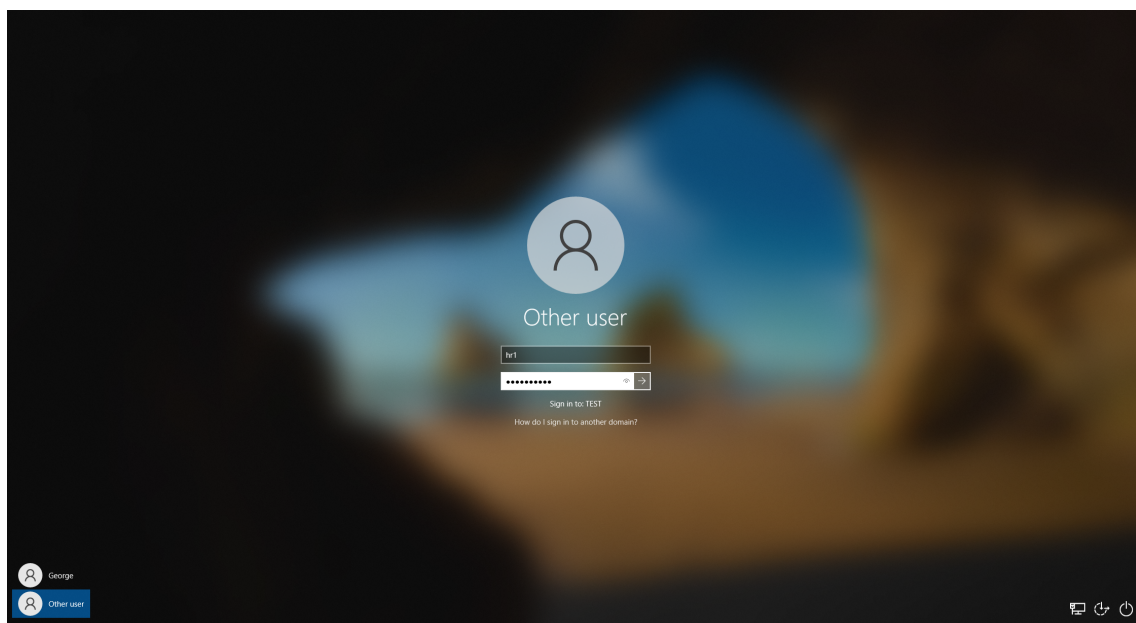

1. Open **System Properties** dialog box. Under System Properties, select **Computer Name** tab and click **Change**. choose **Domain** under Member of, and enter domain name, in my case, this is **test.local**

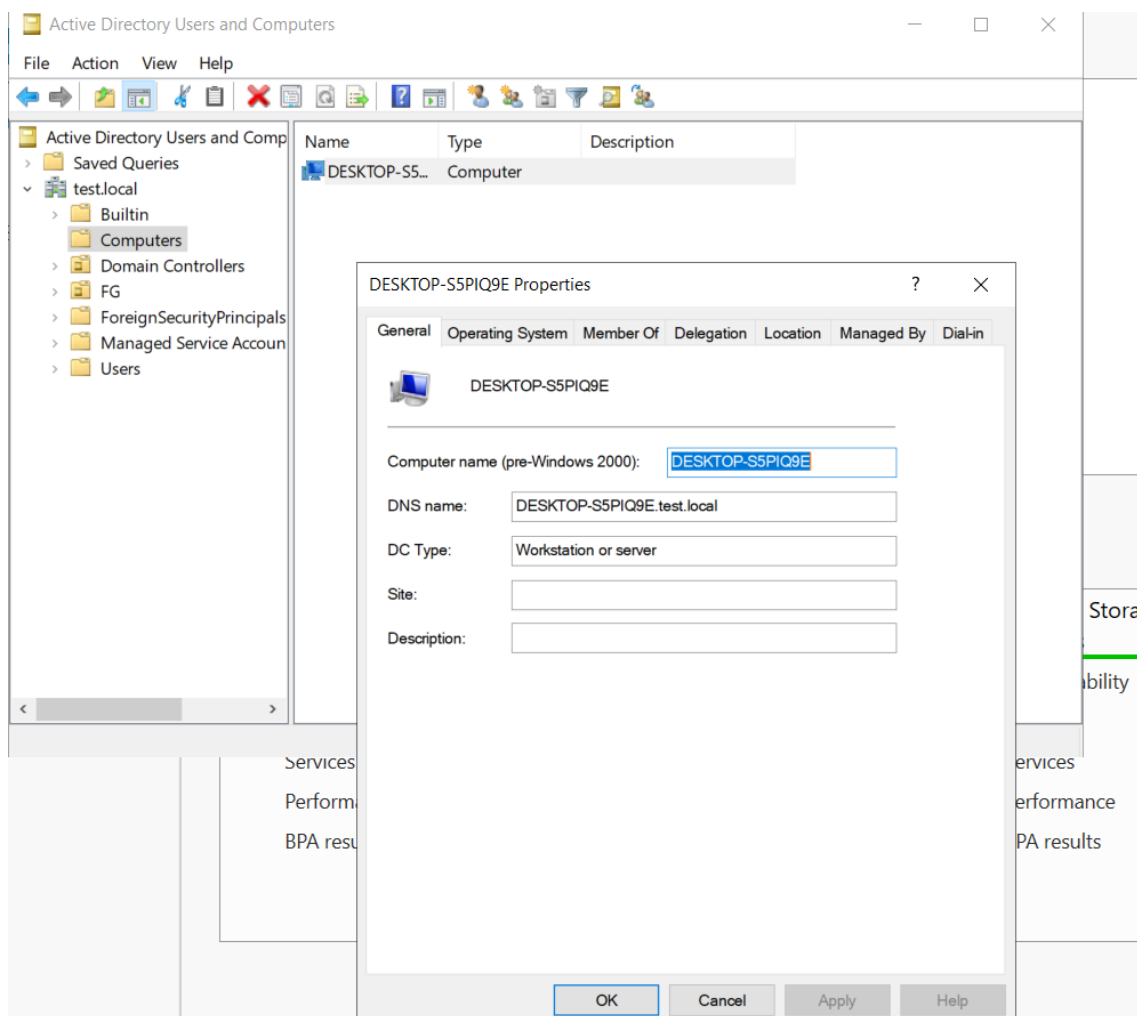

2. Enter Windows Server 2019 Domain Administrator credentials

3. After restarts, can verify Active Directory by login via AD users. In my case, I login via **hr1** which is a member of HR group in my AD

Or go to Windows Server Manager->Active Directory Users and Computers->test.local->Computers

Below is the Client Windows 10 device name, they are same
