Windows Server 2019 Installation

1. Create new virtual machine and choose typical

2. Click next and assign maximum disk size 100gb and choose store virtual disk as a single file

New Virtual Machine Wizard ✕

Specify Disk Capacity
How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB): 100.0

Recommended size for Windows Server 2019: 60 GB

⦿ Store virtual disk as a single file

◯ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.
